Full CV
ldgjose.github.io

Location : Paris, France

Work authorisation : EU (Italian and Argentine)

Driving licence : Category B

Civil engineer (École des Ponts ParisTech · UNC), finishing a final-year placement at Egis on Line 16 of the Grand Paris Express, where I automated quality control of execution documents: 2 min 45 s per drawing became 25 s.

EDUCATION

2023 to 2026
France

École Nationale des Ponts et Chaussées (Institut Polytechnique de Paris)

Civil Engineering and Construction. Fondation des Ponts scholarship.

2020 to 2026
Argentina

Universidad Nacional de Córdoba (UNC)

Civil Engineering, double degree. Ranked 4th out of 220.

PROFESSIONAL EXPERIENCE

02/2026 to 07/2026
Paris, France

BIM COORDINATOR (FINAL-YEAR PLACEMENT)

Egis Group, Grand Paris Express, Line 16

- Coordinated 2 of the line's 3 contract packages (10 stations, 32 ancillary structures, 160 people on the engineering side), at the civil works and building services interface.
- Built an automated quality-control pipeline for execution documents (Python, Dynamo, tpPLM and Catenda APIs, Autodesk Construction Cloud), packaged as a Windows executable, presented to all 160 Line 16 staff and deployed line-wide: 2 min 45 s down to 25 s per drawing, 85% faster, over 35 hours saved per campaign.
- Reviewed 587 drawings from a 1,300-drawing corpus: identified 8 categories of non-conformity, including revision-index mismatches in 18% of cases.
- Automated MEP/structure penetration checks: 986 penetrations processed in 30 s instead of several days, surfacing 73 contract-allocation discrepancies and 15 coding duplicates missed by manual review.

08/2024 to 08/2025
New York, USA

STRUCTURAL ENGINEER

Guy Nordenson and Associates

- Seven-person team, full scope: analysis, calculation reports, deliverables, presentations and direct contact with clients.
- Emanuel Nine Memorial (Charleston): defects cut the marble's allowable tensile stress from 200 to 54 psi. A 3D finite element model in ANSYS (non-linear contacts, hyperelasticity calibrated on test data) recovered pieces previously written off, each worth 5 months of production lead time.
- US Embassy in Paris (construction document review), theatre in Florida, supports for large-scale sculptures for the Guggenheim.

07/2022 to 12/2022
Córdoba, Argentina

BIM MODELLER

Voyansi

- Construction drawings for cinema seating tiers produced from 3D models, in a collaborative BIM environment.

SKILLS

Automation and data : Python (scripts and packaged executables), Dynamo, APIs, IFC, Power BI

BIM and coordination : Revit, Autodesk Construction Cloud, Catenda, Solibri

Analysis and design : SAP2000, ETABS, ANSYS, Rhino/Grasshopper, AutoCAD

Project management : MS Project, Bluebeam, schedule and deliverable tracking

LANGUAGES

Spanish : native **French** : C2, TCF 640 **English** : C1, TOEIC 885

ADDITIONAL

Publication : "If Buildings Could Fly" (Palazzo del Lavoro, P. L. Nervi), with Guy Nordenson

Personal : School exchanges in England, Argentina and Brazil · Seven sports at federated club level
